PROFESSIONAL SUMMARY

A results-driven Full Stack Developer with three years of experience in designing, developing, and deploying scalable web solutions. Adept at both front-end and back-end development, I possess a strong command of technologies like React, Python, Django, Nodejs and JavaScript. With a proven track record of delivering high-quality software in fast-paced environments, I am passionate about transforming ideas into robust, user-friendly applications.

PROFESSIONAL EXPERIENCE

Full Stack Developer - UK Firm (Freelance) | 2024

- Developed a comprehensive web application blog from scratch for a UK-based client.
- **Technologies Used**: React, EmailJS, Firebase, Google Cloud, Bootstrap.
- Delivered a responsive, user-friendly blog platform with real-time data capabilities.
- Integrated automated email notifications to enhance user engagement.
- Deployed and managed the application on Google Cloud, ensuring optimal performance and scalability.

Full Stack Developer - Tech365, Allen, Ikeja, Lagos | 2023 - Present

- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Developed and maintained full-stack applications using JavaScript, Python, Vite, React, Django, HTML5, Firebase, and CSS.
- Efficiently managed the codebase using Version Control systems.
- Applied responsive design principles to optimize user experience across various devices.
- Handled both front-end and back-end development, ensuring responsive and user-friendly client websites.

Full Stack Developer (Freelance Projects)

- **Image Editor**: Developed a JavaScript-based image editor allowing users to edit, change backgrounds, and adjust the contrast of their pictures.
- **Financial App**: Created a financial application using HTML, CSS, and JavaScript for users to analyze their daily, weekly, monthly, and yearly income and expenditure.
- **Todo List Application**: Built a todo-list app using React and Django, with a backend to store items and an API to determine task completion status.
- **Job Hiring Application**: Designed a job hiring platform using React and Express, where companies can register and request developers or data analysts, and tech-skilled individuals can register their skills.

Software Development Instructor

- Provided software development training to students from the UK, USA, and Nigeria.
- Taught various programming languages and tools, leading to successful career outcomes for students.

TECHNICAL SKILLS

- **Software Development**: JavaScript, Python, Vite, React, Django, HTML5, CSS
- **Graphic Design**: Adobe Creative Suite (Photoshop), Branding, Print Design, CorelDraw
- **IT Support**: Troubleshooting, Hardware Maintenance, Software Installation and Configuration, Network Support

---
